

NITIN KUMAR MISHRA

AI Engineer and developer / Agentic AI & Product Builder / Full Stack Developer

Bhopal, India · +91 7489078947 · nitiniszod10@gmail.com · [GitHub](#) · [Portfolio](#) · [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Generative AI Engineer with hands-on experience building production-grade LLM-powered systems, agentic workflows, and RAG pipelines. Founder-operator experience shipping an AI-native product (DocuVerse) from architecture to launch, plus active leadership mentoring open-source contributors at scale (GSSoC'26). Proven track record architecting end-to-end AI automation using LangChain, LangGraph, n8n, Python, and modern vector retrieval systems. Passionate about translating complex business requirements into scalable, maintainable AI systems.

PROFESSIONAL EXPERIENCE

Building – DocuVerse | Logorhythms

2026 – Ongoing

- Founded and lead product development for DocuVerse, an AI-native engineering intelligence platform that turns codebases into narrated, audio-visual walkthroughs and unifies knowledge across GitHub, Slack, Jira, Zoom, Notion, Linear, GitLab, and Confluence.
- Designed the product's cited-answer engine and inline explanation layer, surfacing confidence-scored answers pulled from code, pull requests, and team discussions directly in the IDE.
- Built native MCP (Model Context Protocol) integrations for Cursor, Claude, and VS Code, enabling cross-tool queries over repositories, tickets, and meetings from a single interface.

Open Source Mentor | GSSoC'26 (GirlScript Summer of Code)

2026

- Mentored contributors on a real-world open-source and AI-agent build track, guiding issue selection, code reviews, and pull request quality across assigned projects.
- Coached mentees on Generative AI and agentic workflow fundamentals — prompt engineering, tool-calling agents, and RAG basics — to help them ship production-quality contributions rather than surface-level PRs.
- Supported the program's 'Real-World Building' framework by reviewing project structure, deployment readiness, and technical soundness ahead of leaderboard evaluation.

AI Developer & Lead – Technical Operations | Haron India

Previous

- Architected and deployed production-grade Agentic AI systems including multi-step orchestration, tool-calling agents, and LLM decision pipelines for business automation.
- Designed and implemented RAG pipelines with contextual grounding, achieving high retrieval accuracy for enterprise knowledge bases.

Head – Alumni Relations | Student Activity Council, OIST Bhopal

2025 – 2026

- Led alumni engagement initiatives, mentorship programs, and industry networking events connecting students with professionals.
- Organized industry talks, academic collaborations, and career development sessions for the student community.
- Managed cross-functional coordination between alumni, faculty, and student bodies to drive institutional growth.

Full Stack Engineer (Intern) | Entop Learning

Current

- Designed and developed a complete Learning Management System (LMS) with role-based dashboards for students, instructors, and admins.

Co-Founder & Technical Lead | Bug Biceps *Ongoing*

- Co-founded an AI-driven startup delivering end-to-end Generative AI and full-stack solutions for real-world clients.
- Led client discovery sessions, technical demos, and solution scoping for AI automation use cases.

KEY PROJECTS

- DocuVerse by Logorhythms: AI-native engineering intelligence platform (flagship product, see Experience above) narrated code walkthroughs, cited cross-tool answers, blast-radius analysis, and MCP-native IDE integration. Along side a companies intelligence layer which brings tools like slack, linear, github, notion, jira, zendesk, confluence and meetings into a single unified intelligence layer.
- ExoVetter AI Pipeline: Explainable exoplanet transit detection & vetting system on real Kepler light curves — derives transit parameters via Box Least Squares + trapezoid fit, runs physical diagnostics, and classifies signals with a leakage-safe calibrated ensemble, exposed via a Streamlit dashboard.
- Train-a-miniGPT (JAX AI Stack): Educational framework for implementing and training a GPT style language model with JAX, packaged as interactive Colab ready Jupyter notebooks.
- SonicPersona: AI that learns a person's vocal identity — fine-tunes a personalized TTS voice with LoRA adapters on XTTS v2, auto-transcribes training audio with Whisper, and serves real-time voice generation through a Gradio UI.
- Campus Mitra: RAG-based chatbot for college admission queries; built with LangChain, vector retrieval, and contextual grounding — demonstrates production RAG fundamentals.
- CortexDev: LoRA fine-tuned code-generation LLM optimized for low-VRAM environments using Hugging Face; showcases LLM fine-tuning and ML deployment skills.
- DiffuMint: Stable Diffusion v1.5 LoRA fine-tuning framework designed to run on free-tier GPUs — demonstrates ML model training and optimization expertise.
- AtmoPredict: Multi-model weather forecasting system using LightGBM, Random Forest, and Logistic Regression for next-year predictions.

SKILLS

Generative AI & LLMs: LangChain, LangGraph, LlamaIndex, Agentic Workflows, RAG Pipelines, Prompt Engineering, Structured Outputs, LLM Evaluation, LoRA Fine-Tuning

AI Tools: Hands-on experience with 200+ Generative AI tools across development, vibe coding, research, automation, and deployment workflows

AI Automation: n8n, Workflow Orchestration, Tool Calling, API Integration, MCP Servers (Cursor, Claude, VS Code)

AWS : Amazon Bedrock, DynamoDB, S3, App Runner, Lambda, API Gateway, CloudWatch, IAM, amazon cognito

ML & Data: LightGBM, Random Forest, Logistic Regression, Hugging Face, Gradio, Scikit-learn, TensorFlow, PyTorch, Xgboost

Vector & Retrieval: Vector Databases, Embedding Models, Semantic Search
Programming: Python (primary), SQL, C++, JavaScript, html

Full Stack: Frontend & Backend Development, Authentication Systems , Dashboard Design

ACHIEVEMENTS & CERTIFICATIONS

- NASA Space Apps Challenge 2025 — Regional Winner & Global Nominee
- National Level Hackathon Winner — Won 1 national-level and 3 university-level hackathons
- Finalist in 18+ Software Hackathons — Consistent top performer across national and university-level competitions
- Runner-Up — National Level Ideathon
- OpenAI Builders hackathon finalist

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning
Oriental Group of Institutes, Bhopal • CGPA: 7.29

2024 – 2028
